
Professional Summary

A proactive and detail-oriented Data Analyst with extensive experience supporting strategic and operational decision-making in complex global environments. Highly proficient in Power BI, SQL, and Python, with a proven ability to develop insightful dashboards, ensure data quality, and collaborate effectively with stakeholders to translate complex data into actionable insights. Currently completing an MSc in Big Data Analytics to further enhance predictive modeling and data governance skills.

Professional Experience

Data Analyst Intern (EMEA)

InMode UK – London, UK | Jan 2025 – Present

- Built and maintained ETL pipelines using Python, SQL, and Power Query M to integrate sales, finance, and inventory data, ensuring high-quality reporting.
- Designed interactive Power BI dashboards with advanced DAX, achieving a 15% cost reduction and 10% profit increase through improved forecasting and resource allocation.
- Prepared weekly forecasts, churn, and trend reports, providing actionable insights that guided strategic decision-making and boosted sales performance.
- Partnered with product and engineering teams to embed reporting into ERP workflows, streamlining processes and improving cross-team collaboration.
- Maintained Salesforce data integrity, supporting smooth communication between business areas and enabling data-driven decisions.
- Served as a subject-matter expert for the quote-to-contract process, delivering training and implementing support tools to improve deal quality.
- Delivered high-level reports to Executive Management, translating complex data into clear, actionable insights.
- Built and nurtured key client relationships, identifying opportunities for upselling and cross-selling while ensuring high satisfaction and retention.
- Currently developing a machine learning forecasting model for MSc dissertation, applying predictive analytics to enhance sales planning.

Junior Data Analyst – ID & V

Revolut – UK (Remote) | Feb 2024 – Dec 2024

- Extracted, cleaned, and modeled large datasets in SQL and Python to track operational KPIs.
- Built real-time Power BI dashboards to monitor productivity, enabling faster and more informed decision-making.
- Developed documented data workflows to standardize processes across teams, improving operational efficiency.
- Consistently performed well and got promoted within two quarters.

Education

MSc Big Data Analytics (Expected Distinction)

Sheffield Hallam University | Jan 2025 – Jan 2026

Modules: Business Intelligence & Data Warehousing, Predictive Analytics, Machine Learning, Statistical Modelling

Bachelor of Engineering

University of Kashmir, India | 2018 – 2023

Key Projects

AtliQ Hardware Crisis Management – Power BI [View Project](#) | [See Engagement](#)

- Built an end-to-end BI solution simulating a business recovery plan.
- Created a relational data model in Power BI with complex KPIs in DAX; optimized queries using DAX Studio.
- Implemented advanced UI features and deployed dashboards with scheduled refresh, identifying cost overruns and providing a roadmap for recovery.

Stroke Data Analytics & Prediction [View Project](#) | [See Engagement](#)

- Analyzed 170,000+ health records using Python (Pandas, NumPy).
- Built a Power BI dashboard to monitor patient risk metrics and deliver actionable insights to healthcare stakeholders.

Community & Volunteering

- Coordinated fundraising events raising £2,000+ for Bluebell Wood Hospice.
- Led awareness campaigns for 100+ youth attendees.
- Captained university cricket team for 4 years.
- Organized large-scale university events (500+ attendees).

Technical Skills

- **Data & Analytics:** Python (Pandas, NumPy), SQL, Excel, Power BI, Tableau, Qlik Sense, Predictive Modelling
 - **Sales Operations:** Salesforce, Forecasting, KPI Tracking, Reporting, ETL Pipelines
 - **Soft Skills:** Cross-functional Collaboration, Strategic Reporting, Stakeholder Management
